Permanent magnets 73
Perovskite manganites 130
Perpendicular anisotropy 409
Perpendicular Magnetic anisotropy 403
Phase transitions 67, 363
Photoemission 529
Pinning 523
Precipitation 467
Preparation 271

Quasiparticle bandstructure 529

Random Ising model 177
Random access memory 334
Rare earth metals 529
Rare-earth alloys 111
Rare-earth iron compound 105
Rayleigh–Benard 159
Read heads 334
Reentrant behaviour 77
Reflectivity 297
Relaxation time 575
Remanence 314
Remanence enhancement 543
Resistivity 271
Rietveld refinement 485

Saturation magnetization 253
Scattering 43
Selective dilution 363
Semiconductors 121, 516
Semimagnetic semiconductors 61
Sensors 334
Shape instability 409
Signal-to-noise ratio 253
Single crystal epitaxy 43
Single domain 543
Single phase 543
Single-electron tunneling L391
Site percolation 363
s–f model 564
Solid-state phase formation 247
Solid–gas reaction 281
Sol–gel 277
Sol–gel synthesis 396
Specific heat 363
Spin canting 77
Spin glass 1, 148, L379, 490
Spin valves 19
Spin-dependent scattering 19
Spin-flop transition 100
Spin-glasses 130
Sputtering 403
SQUID 83, 423
Staggered susceptibility 363
Structure 148
Superconductivity 473
Superexchange 297
Superlattices 238, 343
Superparamagnetism 35, L379, 386
Surface magnetic anisotropy 1
Susceptibility L379, 553
Switching time 575

The rate of ball to powder 321
Thermostability 281
Thin film media 253
Thin films 11, 19, 233, 403, 409
Torque 353
Transition fields 473
Transition temperature 481
Transport properties 564
Tunnel magnetoresistance L391

Ultrasound velocity 111

Valence fluctuations 67
Vertical-Bloch-line 419

X-ray diffraction 467, 485
X-ray spectroscopy 297
XRD 423
